Amendment No. 0001 is to provide answers to questions submitted by potential offerors:

1. Based on the Part I Section B Supplies/Services & Price/Cost table, it appears that Union Workers (Carpenter, Carpenter's Apprentice, and Laborer) are required. Please verify if union or non-union workers are required for this contract.

Answer) This contract does not require union workers.

2. If union workers are required, how shall we address the Carpenter's Apprentice Rate? The table calls for a single number; however, the Union Carpenter's Apprentice is paid 60% of the Union Carpenter's Rate during his first six months of work, with a 5% increase every six months until he reaches 100% in five years. When requesting a Union Carpenter's Apprentice from the Local Union, we are supplied with whoever is available with no control of their level of apprenticeship or their contract union rate.

Answer) Union workers are not required for this contract. The solicitation has been amended to remove the line item for the Carpenter's apprentice to allow only for a Journeyman Carpenter and basic Laborer. Please use attached Revised Section B when submitting your offer.

3. If union workers are not required, it appears that the Carpenter's Apprentice Rate does not apply since there is not such thing as a non-union carpenter's apprentice. Please clarify.

Answer) See Answer 2 above.

4. During the site walk, the RE and Safety Officer stated that some of the work may require after hours work in sensitive operation areas. Will the after hours work be at the normal rate, the overtime rate, or at a separate rate to be negotiated?

Answer) Any employee working in excess of a 40 hour work week shall receive compensation at a rate not less than 1 ½ times the basic rate of pay.

5. Will this Federal Contract be tax exempt?

Answer) Contractor's shall be responsible for paying all State and Local taxes.

6. After a quick look, the only labor classification being considered is Carpenter. The SOW includes not only "empty" openings, but also openings with items passing through. We just looked at a similar situation at the Aurora FAA Control Building and the Solicitation we're looking at there requires approximately 30 openings to be fireproofed. Where piping is in the opening, we must hire a tradesman that represents the piping trade (water or sewer pipe requires a plumber; electrical wiring an electrician; etc). A carpenter can be used, at least in the Aurora, IL instance, for openings with not item penetrating the opening. I imagine Denver would have similar Trade demands for the work. Trade agreements aside, I wouldn't hire a carpenter to fireproof around piping, ductwork, or electrical conduits/open wiring since there are specialty fireproofing devices needed for each type of penetrating item.

Answer) Please see attached Revised Section B, a line item for a Plumber Journeyman and Electrician Journeyman. Please use this Revised Section B when submitting your pricing.
